

Night Sky Policy: In effect for many years on the Island of Hawaii. It helps to ensure that our night skies are not grayed out with light pollution, most commonly caused in Seaview from outside yard/porch lights. Please take the time to make sure that all outside lights are shaded and point to the ground and don't leave outside lights on longer than needed so that we can all enjoy the magnificent night sky over Seaview. Also, if you have overhead lighting inside, please use blinds or curtains at night to shield them. The way to determine if you are a light polluter is to walk 1/2 a block from your home at night. If your eyes are irresistibly drawn back to lights from your home please adjust the lighting. If we all pay more attention to our own lighting everyone will notice the amazing night time wonder. . . the starry, starry night.
